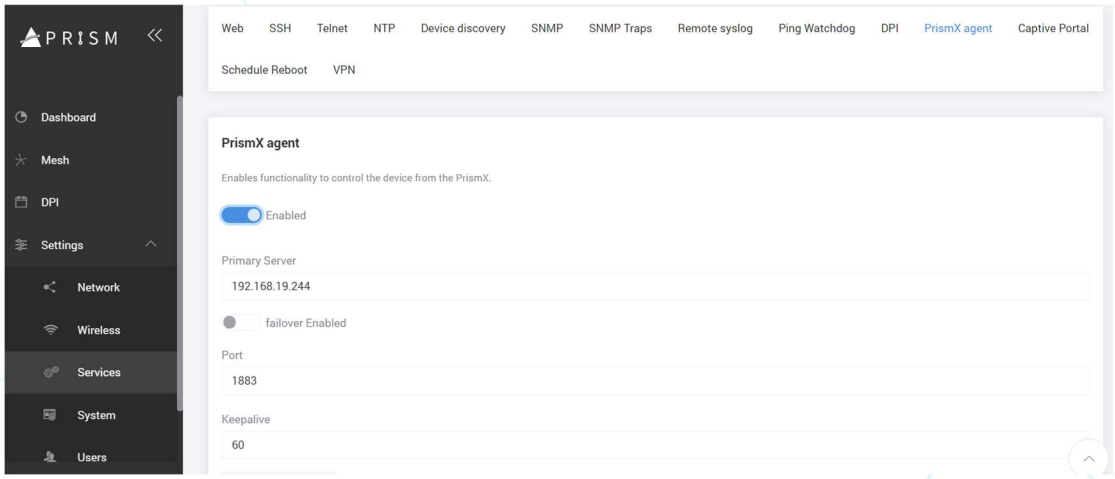
How to setup PrismX agent

PrismX controller is a central management dashboard for enterprise-level Wi-Fi network. With the powerful PrismX controller engine, administrators can manage and monitor multiple sites networks remotely. Administrators can use the PrismX controller to visualize your network. It's designed to put everything in one place, tailored to fit your needs, to help monitor and optimize your Wi-Fi. You can follow the steps below to setup PrismX controller agent service for MI10 and MO10.

1. Access the device settings menu via Ethernet.
   (1) Configure your PC's IP setting to static and then set the IP address to any address from 192.168.19.2 to 192.168.19.250
   (2) Connect your PC's network port to the device WAN port.
   (3) Enter the IP address 192.168.19.1 in your browser.
   (4) In the PRISM login screen use the following login:
   Username: prism
   Password: prism

   Note:
   1. If the device IP address and username/password have been changed, please use the new IP address and username/password to login.
   2. You can refer to the Quick Start Guide for more information on how to login device.

2. After logging in to the device's web GUI, navigate to the Settings/Service/PrismX agent to show the PrismX agent settings page.



3. Enter the PrismX controller IP address (MX100 IP address), and then you can find the device on PrismX controller Device Ready to add list.
   Note: If you use the software version PrismX controller, please enter the IP address of the computer that installed PrismX controller.
